

### **AMENDMENTS TO THE SPECIFICATION**

**Please replace paragraph [006] with the following amended paragraph:**

**[006]** One attempt involves using a proprietary server that stores program guide data. Periodically, the set top box will access the proprietary server in order to update the program guide data stored in the set top box. To schedule an event in this case, the user accesses the proprietary server through a network, such as the Internet. Once logged on to the proprietary server, the user may view the program guide data stored on the proprietary server and input programming instructions or schedule an event that will be downloaded to the set top box of the user.
